

green innovation on the golf course

Lindum has developed a range of products to suit the particular needs of golf courses and has earned a reputation for consistently high quality turf and innovation in grass technology.

We grow a diverse range of turf for greens, tees, fairways, bunkers, high traffic areas and landscaping around the course, including Wildflower turf for biodiversity areas.

Our products include turf made up of varying mixtures of finer grasses suitable for specialist golf greens as well as low input mixtures requiring reduced fertiliser and irrigation.

Greens

LT1 Tournament Greens

A dense Bent/Fescue sward with very high purity and low thatch content.

Features

- Mowing height at harvest 6–8mm
 - The final composition is usually 60–70% Bent and 30–40% Fescue
- Accurate botanical composition carried out by an independent RIPTA agronomist available

Uses

- Ideal for top quality high Bent greens

LT1 is available in three formats

- Grown on sandy loam soil
- Washed to avoid any soil contamination
- Grown to order on USGA specification rootzone

Tees

LT4 Smooth Stalked Tees

A high quality mixture of smooth stalked meadow grass and fescues combining fine appearance with hard wear and recovery, suitable for golf tees and surrounds.

Features

- Fine appearance
- Hard wearing
- Quick regrowth from rhizomes

Uses

- Tees
- Fairways

Roll size

- Standard rolls: 1 square metre
- Large rolls: 0.73m or 1.05m x up to 28m

LT5 Rye Tees

A hard wearing mix combining the repair and recovery of wear tolerant ryegrasses with a dense smooth stalked meadow grass/fescue base.

Features

- Hard wearing
- Quick repair and recovery

Uses

- Hard wearing tees
- Walk-on, walk-off areas

Roll size

- Standard rolls: 1 square metre
- Large rolls: 0.73m or 1.05m x up to 28m

Bunker Revetting

Ready cut strips for building revetted bunkers.

Features

- Ready cut in easy to handle strips 250mm x 1050mm
- Cut 30–40mm thick
- Good thatch
- Sprayed off or unsprayed available
- 80 pieces per pallet provides approximately 3 Face Metres

Uses

- Revetted bunker faces and walls

Also available: bunker lining turf

Lindum Washed Turf

All grades can be supplied as a mature turf washed using highly specialised machinery to remove all soil particles prior to laying on a free draining sand rootzone.

Features

- Avoids contamination of high specification rootzones with fine turfsoil particles
- Avoids creation of a layer which impedes root development and water percolation
- Roots faster as it seeks water and nutrients
- Produces a greater biomass of roots
- Faster establishment time

Uses

New greens surfaces constructed with a high specification sand profile or fibre reinforced rootzone.

Establishment time

3 to 5 weeks dependant on temperature.

Contact us for essential guidelines on establishment and maintenance of washed turf.

Other Grades

LT2 Low Input Fine Turf

An environmentally sustainable mixture suitable for intensive (greens) or extensive use (fairways and semi-rough).

Features

- Fine appearance
- Reduced irrigation, fertiliser and fungicide inputs
- Salt tolerant
- Will tolerate sand splash
- Will mow down to 5mm or can be left to grow to natural height of 200mm

Uses

Intensive

- Greens and greens surrounds as a fescue green replacement

Extensive

- Fairways, bunker surrounds and semi-rough
- Bunker faces
- Exposed drought prone areas
- Difficult banks where mowing is a problem
- Low fertility areas
- Links courses

Other specialist products

Lindum Lokturf™

A fibre reinforced turf giving a durable surface that is stable, firm, free-draining and very hard wearing.

Features

- Durable load bearing surface
- Immediate use
- Greater resistance to wear and tear
- Rapid drainage by reducing rootzone compaction

Uses

- Walkways and high traffic areas
- Golf buggy routes
- Overflow grass car parking
- Grass access roads for emergency vehicles

Roll size

- 1.05m x 8.0m, 35–40mm thick
- 60–70kg per square metre
- Half square metre slabs are also available for small orders

Contact us for guidelines on installation and maintenance of Lokturf™

Lindum Wildflower turf

A ready established native wildflower meadow mixture growing in a strong moisture retentive felt. It can be rolled out on flat surfaces or pegged to banks for soil stabilisation.

Features

- Establishes a ready grown wildflower area
- Felt mat base acts as a barrier to weeds
- Strong and easy to install
- Low maintenance requirement

Uses

- Enhancing biodiversity around the course

Roll size

- 0.6m or 1.2m wide x 2.0m long
