

green innovation on the golf course

Golf courses need a diverse range of turf for greens, tees, fairways, bunkers, high traffic areas and landscaping around the course.

Why choose Lindum?

Lindum has developed a range of products to suit the particular needs of golf courses and has earned a reputation for consistently high quality turf and innovation in grass technology.

Our range includes turf made up of varying mixtures of finer grasses suitable for specialist golf greens and tees as well as low maintenance mixtures requiring reduced mowing and irrigation.

Greens

LT1 Tournament Greens

A dense Bent/Fescue sward with very high purity and low thatch content.

Features

- Mowing height at harvest 6-8mm
- The final composition is usually 60-70% Bent and 30-40% Fescue
 - Accurate botanical composition carried out by an independent RIPTA agronomist available

Uses

• Ideal for top quality high Bent greens

LT1 is available in three formats

- Grown on USGA specification rootzone
- Washed to avoid any soil contamination
- · Grown on sandy loam soil

LT2 Low Maintenance Fine Turf

An environmentally sustainable mixture requiring lower maintenance suitable for intensive (greens) or extensive use (fairways and semi-rough).

Features

- Fine appearance
- Reduced irrigation, fertiliser and fungicide inputs
- Requires a greatly reduced mowing regime
- Will mow down to 5mm or can be left to grow to natural height of 200mm

Uses

Intensive

Greens and greens surrounds as a fescue green replacement

Extensiv

- · Fairways, bunker surrounds and semi-rough
- Exposed drought prone areas
- Difficult banks where moving is a problem
- Low fertility areas

LT3 Ryegreen

A dense attractive fine turf, which becomes even finer as mowing heights are gradually reduced.

Features

- Contains the outstanding fine-leafed ryegrass Bargold, which can withstand mowing down to 5-6mm and heavy wear
- Highly rated for fineness of leaf, shoot density, and resistance to red thread

Uses

- Greens surrounds
- Greens subject to heavy wear e.g. pitch and putt courses

Tees and Fairways

LT4 Smooth Stalked Tees

A high quality mixture of smooth stalked meadow grass and fescues combining fine appearance with hard wear and recovery, suitable for golf tees and surrounds.

Features

- Fine appearance
- Hard wearing
- · Quick regrowth from rhizomes

Uses

- Tees
- Fairways

LT5 Rye Tees

A hard wearing mix combining the repair and recovery of wear tolerant ryegrasses with a dense smooth stalked meadow grass/fescue base.

Features

- Hard wearing
- · Quick repair and recovery

Uses

· Hard wearing tees

LT9 RTF

A unique turf containing rhizomatous tall fescue, which has been awarded the prestigious Waterwise Marque for its drought resistant qualities. Its rhizomatous root system assists in rapid repair and soil stabilisation.

Features

- Drought tolerant
- Deep rooting up to 1.5 metres
- Produces rhizomes (horizontal underground stems) for repair of damaged areas

Uses

- Bunker surrounds
- Footpaths and walkways

	LT2 30% Barkoel Crested Hairgrass, 30% Bardur Hard Fescue, 40% Barcrown Slender Creeping Red Fescue
	LT3 30% Bargold Perennial Ryegrass, 50% Barcrown Slender Creeping Red Fescue, 10% Baroxi Chewings Fescue, 10% Bargreen Chewings Fescue
	LT4 30% Limousine Smooth Stalked Meadow Grass, 35% Cezanne Slender Creeping Red Fescue, 20% Musica Chewings Fescue, 15% Herald Creeping Red Fescue
	LT5 30% Bargold Perennial Ryegrass, 15% Julius Smooth Stalked Meadow Grass, 27.5% Bargreen Chewings Fescue, 27.5% Barcrown Slender Creeping Red Fescue
	LT9 45% Labarinth Rhizomatous Tall Fescue, 40% Barlexas Tall Fescue, 15% Bartender Smooth Stalked Meadow Grass
ROLL SIZE	Standard rolls: 1 metre square Large rolls: 0.75m or 1.1m x 28m Final thickness: 15-20mm
WEIGHT	15-20kg per m ² depending on saturation
SPECIFICATION GUIDANCE NOTES	Turf to comply with the TGA (Turfgrass Growers Association) Standard and BS3969.
	The turf soil should be of a sandy loam nature with no stones.
	The grass will be dense, of uniform green colour, free of broadleaved weeds and not visibly affected by pest or disease.

Lindum Washed Turf

All grades can be supplied as a mature turf washed using highly specialised machinery to remove all soil particles prior to laying on a free draining sand rootzone.

Benefits

- Avoids contamination of high specification rootzones with fine turfsoil particles
- Avoids creation of a layer which impedes root development and water percolation
- Roots faster as it seeks water and nutrients
- Produces a greater biomass of roots
- Reduced divoting
- Faster establishment time

Uses

New greens surfaces constructed with a high specification sand profile or fibre reinforced rootzone.

Establishment time

3 to 5 weeks dependant on temperature.

Contact us for essential guidelines on establishment and maintenance of washed turf.

Other specialist products

Lindum Grassfelt™ – a mature soil-less turf, growing in a biodegradable felt, especially designed to retain moisture as well as giving great strength. Ideal for steep slopes, embankments and erosion control.

Real Grass Tee Mats – Lindum Grassfelt™ can be used to replace worn tees with REAL grass during winter months. Specially grown using tough grasses for golf use and available in varying roll widths and lengths, so your Tee Mat can come in one piece. Just lay it down and play off.

Lindum LokturfTM – a fibre reinforced turf giving a durable surface that is stable, firm, free-draining, consistently level and very hard wearing. It is ideal for walkways and high traffic areas around the golf course, as well as being suitable for overflow grass car parking and grass access roads for emergency vehicles.

Lindum Wildflower – a ready established wildflower meadow mixture growing in a moisture retentive biodegradable felt. Lightweight and easy to install, Lindum Wildflower creates an instant wildflower meadow – ideal for enhancing biodiversity on the golf course.
